Indicators: Google Search Console Traffic Drops Without Ranking Loss

## *So Let's Discuss...*

- ✓ How To Adapt Traditional SEO Practices
- ✓ The 3 Tiers Of Ranking A Website
- ✓ The Different AI Channels
- ✓ How To Use AI To Forecast Trends

# Traditional SEO Practices

## SEO Framework: *WHY* → *HOW* → *WHAT*

### WHY (The Purpose of SEO)

- ✓ Drive *qualified* traffic
- ✓ Build trust & authority
- ✓ Serve users & search engines

### HOW (Strategy)

- ✓ Identify audience & analyze behavior
- ✓ Match content to user intent
- ✓ Iterate & improve based on real data

### WHAT (Tactics)

- ✓ Keyword targeting, content creation, trust factors
- ✓ Link building, on-page optimization
- ✓ Technical fixes, local SEO, continuous updates

TIP: Take a picture of this page!

# What Ranks Websites?

## Technical SEO

Make sure it works  
& Google likes it

1

## Proper Content

Satisfy the User  
with your offerings

2

## Trust Signals

Links to your website from  
authoritative sources

3

# Let's Break It Down

# Tier 1: Technical SEO

## **SITE 'AUDITS'**

# Site Audits

- X Duplicate Content
- X Orphaned Pages (Aren't Linked Anywhere)
- X Not Indexed & No Follow Tags

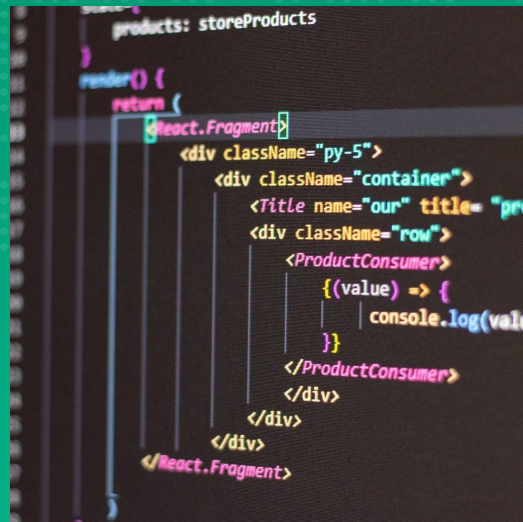

- ✓ Similar Layouts for Property Pages is normal
- ✓ Not all pages need traffic
- ✓ You're controlling what should and shouldn't be indexed... just like Google wants

Understanding and interpreting errors on a site audit is the key to success!

# Technical SEO

- ✓ Mobile-friendly site
- ✓ Fast loading speed (Core Web Vitals)
- ✓ Clean URL structure (e.g., /rentals/area-beachfront not /?id=34x56)
- ✓ Understanding crawl errors
- ✓ Run a crawl with Screaming Frog or Semrush
- ✓ Fix any redirect chains, broken links, and duplicate title tags
- ✓ Use Google Search Console to monitor indexing issues & understand them

This is your “data hygiene.” No good insights come from a messy setup. Clean structure = better ranking and crawlability.

## Tier 2: Proper Content

**PAGE DEPTH**  
&  
**KEYWORDS**

# Quality Traffic vs Quantity

Conversion  
Focused

# Quality Traffic

VS

# Quantity Traffic

Higher Bounce  
Rate

**High Intent Keywords** – Searches like “oceanfront [area] rentals”, “pet-friendly vacation rentals in [area]”, or “one-bedroom rentals in [area]” indicate strong booking intent.

## Direct Booking Potential

**Lower Bounce Rate** – Users landing on the site are more likely to stay, engage, and take action.

**Stronger ROI on Paid Ads** – PPC campaigns targeting these keywords have a higher return on ad spend (ROAS).

**More Valuable SEO Rankings** – Ranking well for high-intent vacation rental terms leads to consistent bookings and long-term revenue growth.

**Broad Interest Keywords** – Topics like “best restaurants in [area]”, “weather in [area]”, or “things to do in [area]” attract a wider audience.

**Builds EEAT** (Experience, Expertise, Authority, Trustworthiness) Google rewards sites that provide helpful, informative content, improving overall rankings.

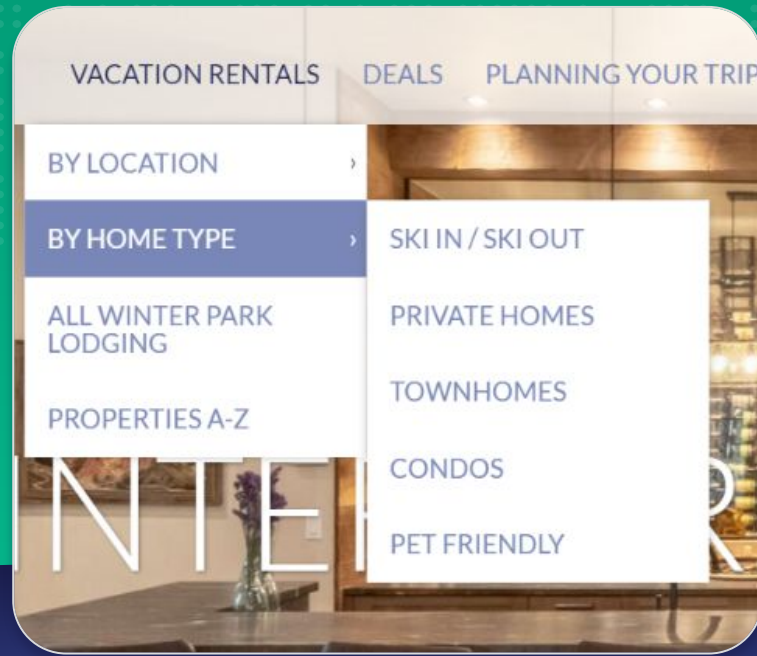

**Increases Brand Awareness** – Visitors may not book immediately but remember the brand for future stays.

**Can Contribute to Indirect Conversions** – A user researching restaurants or events might later book a stay after discovering the website.

# If You Build It...

- ✓ Google Ranks PAGES, not WEBSITES
- ✓ Create dedicated search results pages for major things people are looking for
- ✓ Optimize these pages with internal links and rich content

# Is Your Property Detail Page Confusing?

- ✓ High quality photos (w/ captions) & nice cover photo
- ✓ Property FAQs
- ✓ Current Reviews - Trust Factors!
- ✓ PRICING - Make sure your pricing is clear & competitive
- ✓ Clear & Easy-To-Find CTAs (Book Now & Contact)

Tip: Invest in photos but keep your editing style simple!

# What's E-E-A-T

## *Search Quality Evaluator Guideline on Building Content & Trust*

- ✓ **Experience:** About Us Page
- ✓ **Expertise:** FAQ pages, Area Guides
- ✓ **Authority:** Reviews, Backlinks, Media page
- ✓ **Trust:** User experience, Reviews, Easy to find contact information, fast page loads

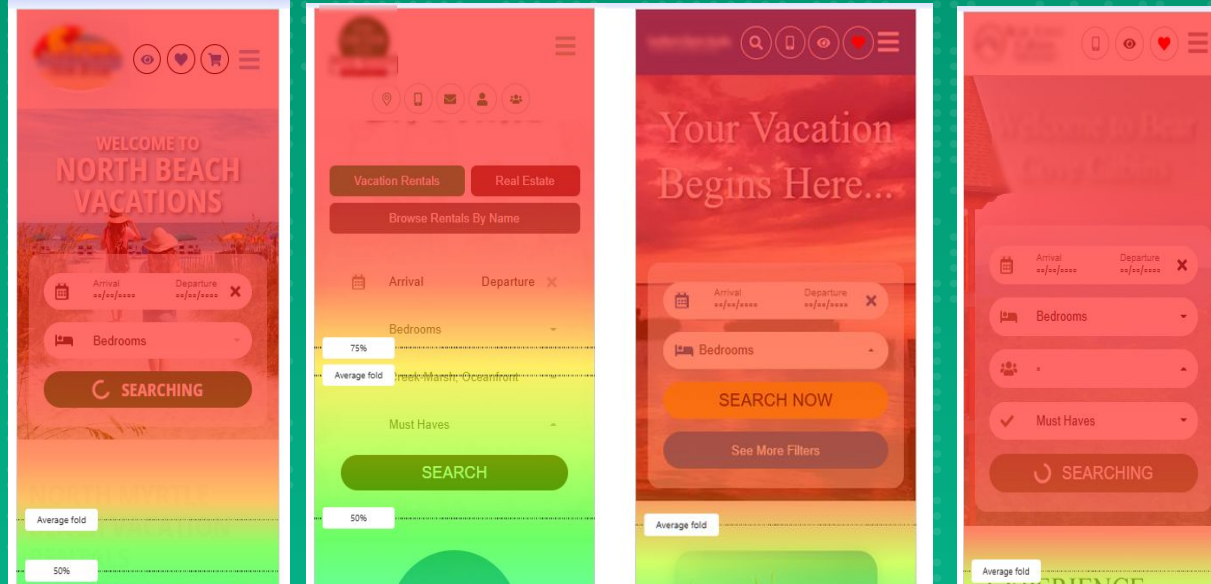

# Tier 3: Trust Signals

## **CLEAR UX** & **CONVERSION PATHS**

# User Experience (UX)

# Prevent Friction

# Is there a pattern!?

## What We're Seeing

- ✓ Informational blog posts
- ✓ Specific vacation rental listings
- ✓ Filtered search results (e.g., 2-bedroom homes, pet friendly)

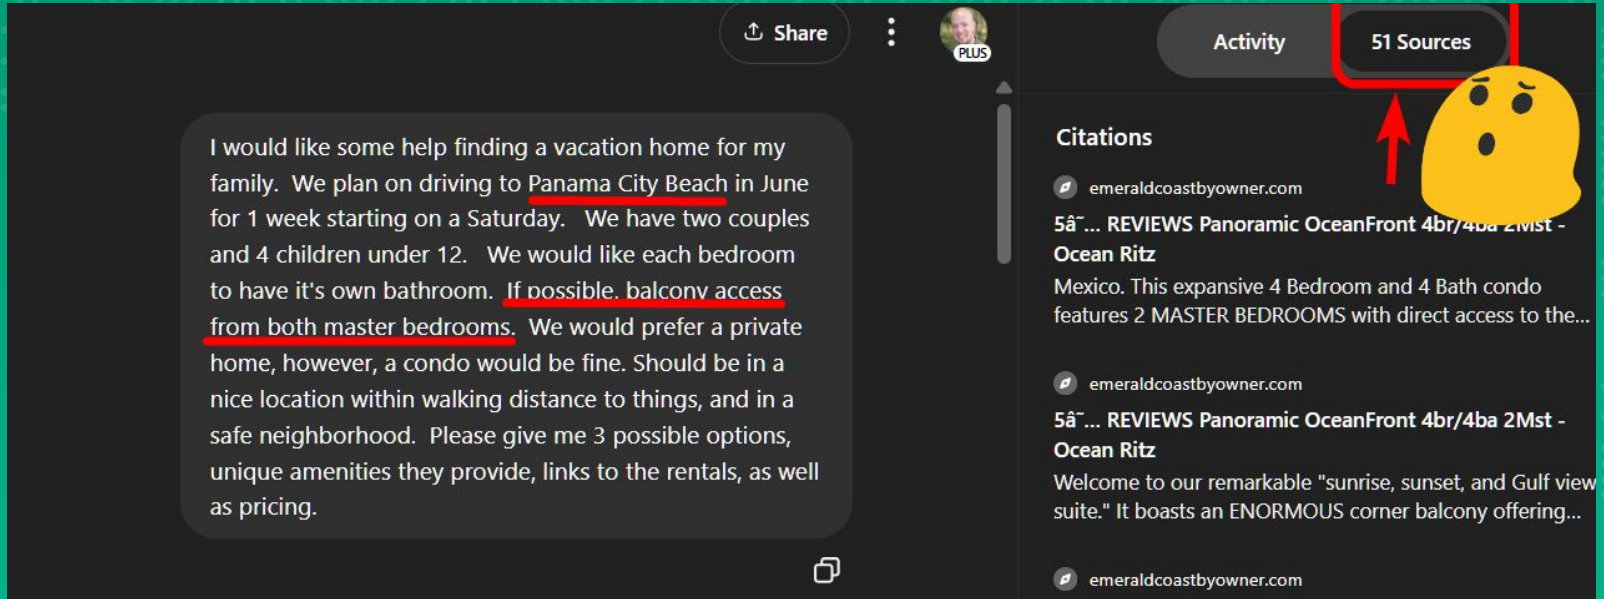

**What They Have In Common:** These pages reflect long-tail SEO strategies and are deep-linked content, not homepage landings.

This means users landing from AI searches with high intent, looking for **specific** answers or rentals.

# We Did Our Own Experiment

I would like some help finding a vacation home for my family. We plan on driving to Panama City Beach in June for 1 week starting on a Saturday. We have two couples and 4 children under 12. We would like each bedroom to have it's own bathroom. If possible, balconv access from both master bedrooms. We would prefer a private home, however, a condo would be fine. Should be in a nice location within walking distance to things, and in a safe neighborhood. Please give me 3 possible options, unique amenities they provide, links to the rentals, as well as pricing.

# Knowing Your AI Travel Agents

- ✓ **ChatGPT:** This is your fun robot, so make your pages sound natural, helpful, and conversational, like you're giving local tips to a friend.
- ✓ **Gemini:** This one's your type-A planner. So serve clear, structured content with fast facts, rich snippets, and schema to help it organize and rank your pages.
- ✓ **Perplexity:** This overthinker double-checks everything, so back up your vacation rental info with sources, updates, and links that prove you know what's happening now.
- ✓ **DeepSeek:** This is your quiet, code-loving logic machine, so make your site technically flawless, well-structured, and full of deep, interconnected content it can crawl and understand.

Robots have personalities too! Or at least defining characteristics!

# What Can YOU do with AI?

✓ **Analyze** Google Trends & Market Reports

✓ **Create Content calendars** for social media and email blasts

✓ **Help write ads** tailored to your voice

✓ **Help define a marketing strategy** for each month

✓ **Spot trending search terms**

✓ **Crunch numbers fast** (export your PM's reservation history)

# Real World Scenarios

- ✓ You use AI to compare this year's spike against previous years.
- ✓ Use Google Trends to Spot Broad Booking Behavior
- ✓ Export GSC data and analyze search queries driving traffic Feed the data into ChatGPT and ask it to group the queries by month to see a pattern

Knowing Your Audience Is The Key!

# Beep Bop Boop...

## Predictions for 2025 Digital Marketing Strategy

Month	Recommended Action
March-April	Start <b>early campaign push</b> ; retarget site visitors, test spring-break creatives
May-June	Boost <b>family trip targeting</b> , especially "Outer Banks Rentals 2025" in ad copy
July	Focus on <b>last-minute deals</b> , extend reach with YouTube and Display retargeting
August	Start pivoting to <b>fall shoulder season</b> messaging by late month
Sept-Nov	Use this time for <b>content creation</b> and local SEO expansion
Dec-Jan	Capitalize on <b>holiday planning phase</b> for early bookings and gift-a-trip promotion

# Final Takeaways

1. **SEO Is Evolving**, but the Core signals remain the same
2. **Process Matters: Intent-First Thinking Wins** : Identifying patterns and matching user intent = higher-quality traffic and better conversions.
3. **AI Is Not Just a Tool**, It's a Channel and Traffic Source
4. **AI isn't a replacement for SEO**, it's an extension of it.
